3. Supplier delivers goods.
4. Receiving confirms delivered quantities.
5. Inventory levels update across system.

flowchart LR

```
A[Manager checks low stock] --> B[Create purchase order]
B --> C[Supplier delivers items]
C --> D[Receive and verify quantities]
D --> E[Inventory updated]
```

Process B: Walk-in Sale

1. Cashier selects customer or guest profile.
2. Cashier creates order for item(s).
3. System verifies stock availability.
4. Stock is reserved/deducted.
5. Order is confirmed and stored.

flowchart LR

```
A[Cashier selects customer] --> B[Create order]
B --> C[Sales validates customer]
```

```
C --> D[Sales requests stock reserve]
D --> E[Order confirmed]
```

Process C: New Customer Enrollment

1. Customer provides contact details.
2. CRM staff creates customer profile.
3. Profile becomes available for sales lookup.
4. Future purchases are linked to customer history.

```
flowchart LR
    A[Collect customer details] --> B[Create CRM record]
    B --> C[Record available to sales]
    C --> D[Future orders linked to profile]
```

Process D: Supplier Management

1. Purchasing team registers supplier.
2. Supplier is associated with procurement transactions.
3. Supplier records are used in reporting and follow-up.

```
flowchart LR
    A[Register supplier] --> B[Use supplier in purchase orders]
    B --> C[Track supplier performance and history]
```

Process E: Receiving Purchase Order

1. Warehouse receives delivery.
2. Manager marks PO as received.
3. System pushes restock event to inventory service.
4. Updated stock becomes available for sales.

```
flowchart LR
    A[Warehouse receives goods] --> B[Manager receives PO]
    B --> C[Purchasing calls inventory restock]
    C --> D[Stock available for sales]
```

4. Operational Pain Points

- Manual stock tracking causes stockouts and over-ordering.
- No integrated view between sales and inventory.
- Customer records are fragmented and underused.
- Slow purchasing cycle due to spreadsheet approvals.
- Lack of traceable process ownership.

5. User Roles and Permissions Matrix

Role	Login	View Inventory	Create Sales Order	Manage CRM	Create PO	Receive PO
------	-------	----------------	--------------------	------------	-----------	------------

Admin	Yes	Yes	Yes	Yes	Yes	Yes
Manager	Yes	Yes	Yes	Yes	Yes	Yes
Staff	Yes	Yes	Yes	Limited (view only)	No	No

6. Business-to-Technical Traceability

- Pain point: stock mismatch -> Services: inventory-service, sales-service, purchasing-service
- Pain point: customer history unavailable -> Service: crm-service
- Pain point: uncontrolled access -> Service: auth-service, JWT role checks in all modules
- Pain point: disconnected systems -> API gateway and inter-service APIs
